Report: Report Budget

In this section we discuss report budget. The observed value was 59.3 compared to 72.9 in the prior period, a change of -7.7 percent. This reflects quarterly expenses across 5 units. In this section we discuss report budget. The observed value was 59.3 compared to 72.9 in the prior period, a change of -7.7 percent. This reflects quarterly expenses across 5 units. In this section we discuss report budget. The observed value was 59.3 compared to 72.9 in the prior period, a change of -7.7 percent. This reflects quarterly expenses across 5 units. In this section we discuss report budget. The observed value was 59.3 compared to 72.9 in the prior period, a change of -7.7 percent. This reflects quarterly expenses across 5 units.

In this section we discuss report budget. The observed value was 53.1 compared to 77.0 in the prior period, a change of 9.7 percent. This reflects quarterly expenses across 7 units. In this section we discuss report budget. The observed value was 53.1 compared to 77.0 in the prior period, a change of 9.7 percent. This reflects quarterly expenses across 7 units. In this section we discuss report budget. The observed value was 53.1 compared to 77.0 in the prior period, a change of 9.7 percent. This reflects quarterly expenses across 7 units. In this section we discuss report budget. The observed value was 53.1 compared to 77.0 in the prior period, a change of 9.7 percent. This reflects quarterly expenses across 7 units.

In this section we discuss report budget. The observed value was 87.9 compared to 85.4 in the prior period, a change of 6.1 percent. This reflects travel policy across 8 units. In this section we discuss report budget. The observed value was 87.9 compared to 85.4 in the prior period, a change of 6.1 percent. This reflects travel policy across 8 units. In this section we discuss report budget. The observed value was 87.9 compared to 85.4 in the prior period, a change of 6.1 percent. This reflects travel policy across 8 units. In this section we discuss report budget. The observed value was 87.9 compared to 85.4 in the prior period, a change of 6.1 percent. This reflects travel policy across 8 units.

In this section we discuss report budget. The observed value was 50.8 compared to 76.0 in the prior period, a change of -1.1 percent. This reflects tooling budget across 6 units. In this section we discuss report budget. The observed value was 50.8 compared to 76.0 in the prior period, a change of -1.1 percent. This reflects tooling budget across 6 units. In this section we discuss report budget. The observed value was 50.8 compared to 76.0 in the prior period, a change of -1.1 percent. This reflects tooling budget across 6 units. In this section we discuss report budget. The observed value was 50.8 compared to 76.0 in the prior period, a change of -1.1 percent. This reflects tooling budget across 6 units.

In this section we discuss report budget. The observed value was 26.2 compared to 34.2 in the prior period, a change of -16.9 percent. This reflects quarterly expenses across 8 units. In this section we discuss report budget. The observed value was 26.2 compared to 34.2 in the prior period, a change of -16.9 percent. This reflects quarterly expenses across 8 units. In this section we discuss report budget. The observed value was 26.2 compared to 34.2 in the prior period, a change of -16.9 percent. This reflects quarterly expenses across 8 units. In this section we discuss report budget. The observed value was 26.2 compared to 34.2 in the prior period, a change of -16.9 percent. This reflects quarterly expenses across 8 units.

In this section we discuss report budget. The observed value was 85.6 compared to 14.9 in the prior period, a change of -7.6 percent. This reflects vendor consolidation across 4 units. In this section we discuss report budget. The observed value was 85.6 compared to 14.9 in the prior

period, a change of -7.6 percent. This reflects vendor consolidation across 4 units. In this section we discuss report budget. The observed value was 85.6 compared to 14.9 in the prior period, a change of -7.6 percent. This reflects vendor consolidation across 4 units. In this section we discuss report budget. The observed value was 85.6 compared to 14.9 in the prior period, a change of -7.6 percent. This reflects vendor consolidation across 4 units.

In this section we discuss report budget. The observed value was 27.7 compared to 93.2 in the prior period, a change of -5.3 percent. This reflects quarterly expenses across 6 units. In this section we discuss report budget. The observed value was 27.7 compared to 93.2 in the prior period, a change of -5.3 percent. This reflects quarterly expenses across 6 units. In this section we discuss report budget. The observed value was 27.7 compared to 93.2 in the prior period, a change of -5.3 percent. This reflects quarterly expenses across 6 units. In this section we discuss report budget. The observed value was 27.7 compared to 93.2 in the prior period, a change of -5.3 percent. This reflects quarterly expenses across 6 units.

In this section we discuss report budget. The observed value was 98.1 compared to 46.3 in the prior period, a change of 15.0 percent. This reflects quarterly expenses across 8 units. In this section we discuss report budget. The observed value was 98.1 compared to 46.3 in the prior period, a change of 15.0 percent. This reflects quarterly expenses across 8 units. In this section we discuss report budget. The observed value was 98.1 compared to 46.3 in the prior period, a change of 15.0 percent. This reflects quarterly expenses across 8 units. In this section we discuss report budget. The observed value was 98.1 compared to 46.3 in the prior period, a change of 15.0 percent. This reflects quarterly expenses across 8 units.

In this section we discuss report budget. The observed value was 20.3 compared to 50.3 in the prior period, a change of 5.2 percent. This reflects quarterly expenses across 2 units. In this section we discuss report budget. The observed value was 20.3 compared to 50.3 in the prior period, a change of 5.2 percent. This reflects quarterly expenses across 2 units. In this section we discuss report budget. The observed value was 20.3 compared to 50.3 in the prior period, a change of 5.2 percent. This reflects quarterly expenses across 2 units. In this section we discuss report budget. The observed value was 20.3 compared to 50.3 in the prior period, a change of 5.2 percent. This reflects quarterly expenses across 2 units.

In this section we discuss report budget. The observed value was 66.5 compared to 99.6 in the prior period, a change of -5.9 percent. This reflects vendor consolidation across 2 units. In this section we discuss report budget. The observed value was 66.5 compared to 99.6 in the prior period, a change of -5.9 percent. This reflects vendor consolidation across 2 units. In this section we discuss report budget. The observed value was 66.5 compared to 99.6 in the prior period, a change of -5.9 percent. This reflects vendor consolidation across 2 units. In this section we discuss report budget. The observed value was 66.5 compared to 99.6 in the prior period, a change of -5.9 percent. This reflects vendor consolidation across 2 units.

In this section we discuss report budget. The observed value was 6.6 compared to 1.3 in the prior period, a change of -16.9 percent. This reflects vendor consolidation across 4 units. In this section we discuss report budget. The observed value was 6.6 compared to 1.3 in the prior period, a change of -16.9 percent. This reflects vendor consolidation across 4 units. In this section we discuss report budget. The observed value was 6.6 compared to 1.3 in the prior period, a change of -16.9 percent. This reflects vendor consolidation across 4 units. In this section we discuss report budget. The observed value was 6.6 compared to 1.3 in the prior period, a change of -16.9 percent. This reflects vendor consolidation across 4 units.

In this section we discuss report budget. The observed value was 6.5 compared to 72.6 in the prior period, a change of -13.1 percent. This reflects travel policy across 8 units. In this section we discuss report budget. The observed value was 6.5 compared to 72.6 in the prior period, a change of -13.1 percent. This reflects travel policy across 8 units. In this section we discuss report budget. The observed value was 6.5 compared to 72.6 in the prior period, a change of -13.1 percent. This reflects travel policy across 8 units. In this section we discuss report budget. The observed value was 6.5 compared to 72.6 in the prior period, a change of -13.1 percent. This reflects travel policy across 8 units.

In this section we discuss report budget. The observed value was 56.7 compared to 64.1 in the prior period, a change of -8.0 percent. This reflects vendor consolidation across 5 units. In this section we discuss report budget. The observed value was 56.7 compared to 64.1 in the prior period, a change of -8.0 percent. This reflects vendor consolidation across 5 units. In this section we discuss report budget. The observed value was 56.7 compared to 64.1 in the prior period, a change of -8.0 percent. This reflects vendor consolidation across 5 units. In this section we discuss report budget. The observed value was 56.7 compared to 64.1 in the prior period, a change of -8.0 percent. This reflects vendor consolidation across 5 units.

In this section we discuss report budget. The observed value was 6.3 compared to 55.0 in the prior period, a change of 7.4 percent. This reflects tooling budget across 8 units. In this section we discuss report budget. The observed value was 6.3 compared to 55.0 in the prior period, a change of 7.4 percent. This reflects tooling budget across 8 units. In this section we discuss report budget. The observed value was 6.3 compared to 55.0 in the prior period, a change of 7.4 percent. This reflects tooling budget across 8 units. In this section we discuss report budget. The observed value was 6.3 compared to 55.0 in the prior period, a change of 7.4 percent. This reflects tooling budget across 8 units.

In this section we discuss report budget. The observed value was 100.0 compared to 61.9 in the prior period, a change of -8.7 percent. This reflects vendor consolidation across 5 units. In this section we discuss report budget. The observed value was 100.0 compared to 61.9 in the prior period, a change of -8.7 percent. This reflects vendor consolidation across 5 units. In this section we discuss report budget. The observed value was 100.0 compared to 61.9 in the prior period, a change of -8.7 percent. This reflects vendor consolidation across 5 units. In this section we discuss report budget. The observed value was 100.0 compared to 61.9 in the prior period, a change of -8.7 percent. This reflects vendor consolidation across 5 units.

In this section we discuss report budget. The observed value was 84.3 compared to 77.3 in the prior period, a change of 17.7 percent. This reflects tooling budget across 3 units. In this section we discuss report budget. The observed value was 84.3 compared to 77.3 in the prior period, a change of 17.7 percent. This reflects tooling budget across 3 units. In this section we discuss report budget. The observed value was 84.3 compared to 77.3 in the prior period, a change of 17.7 percent. This reflects tooling budget across 3 units. In this section we discuss report budget. The observed value was 84.3 compared to 77.3 in the prior period, a change of 17.7 percent. This reflects tooling budget across 3 units.

In this section we discuss report budget. The observed value was 18.5 compared to 47.7 in the prior period, a change of -4.0 percent. This reflects tooling budget across 8 units. In this section we discuss report budget. The observed value was 18.5 compared to 47.7 in the prior period, a change of -4.0 percent. This reflects tooling budget across 8 units. In this section

we discuss report budget. The observed value was 18.5 compared to 47.7 in the prior period, a change of -4.0 percent. This reflects tooling budget across 8 units. In this section we discuss report budget. The observed value was 18.5 compared to 47.7 in the prior period, a change of -4.0 percent. This reflects tooling budget across 8 units.

In this section we discuss report budget. The observed value was 14.2 compared to 38.0 in the prior period, a change of 18.4 percent. This reflects travel policy across 7 units. In this section we discuss report budget. The observed value was 14.2 compared to 38.0 in the prior period, a change of 18.4 percent. This reflects travel policy across 7 units. In this section we discuss report budget. The observed value was 14.2 compared to 38.0 in the prior period, a change of 18.4 percent. This reflects travel policy across 7 units. In this section we discuss report budget. The observed value was 14.2 compared to 38.0 in the prior period, a change of 18.4 percent. This reflects travel policy across 7 units.

In this section we discuss report budget. The observed value was 84.6 compared to 82.1 in the prior period, a change of -8.8 percent. This reflects travel policy across 6 units. In this section we discuss report budget. The observed value was 84.6 compared to 82.1 in the prior period, a change of -8.8 percent. This reflects travel policy across 6 units. In this section we discuss report budget. The observed value was 84.6 compared to 82.1 in the prior period, a change of -8.8 percent. This reflects travel policy across 6 units. In this section we discuss report budget. The observed value was 84.6 compared to 82.1 in the prior period, a change of -8.8 percent. This reflects travel policy across 6 units.

In this section we discuss report budget. The observed value was 10.8 compared to 73.2 in the prior period, a change of -10.3 percent. This reflects quarterly expenses across 3 units. In this section we discuss report budget. The observed value was 10.8 compared to 73.2 in the prior period, a change of -10.3 percent. This reflects quarterly expenses across 3 units. In this section we discuss report budget. The observed value was 10.8 compared to 73.2 in the prior period, a change of -10.3 percent. This reflects quarterly expenses across 3 units. In this section we discuss report budget. The observed value was 10.8 compared to 73.2 in the prior period, a change of -10.3 percent. This reflects quarterly expenses across 3 units.

In this section we discuss report budget. The observed value was 19.7 compared to 49.8 in the prior period, a change of 11.9 percent. This reflects quarterly expenses across 9 units. In this section we discuss report budget. The observed value was 19.7 compared to 49.8 in the prior period, a change of 11.9 percent. This reflects quarterly expenses across 9 units. In this section we discuss report budget. The observed value was 19.7 compared to 49.8 in the prior period, a change of 11.9 percent. This reflects quarterly expenses across 9 units. In this section we discuss report budget. The observed value was 19.7 compared to 49.8 in the prior period, a change of 11.9 percent. This reflects quarterly expenses across 9 units.

In this section we discuss report budget. The observed value was 10.1 compared to 44.9 in the prior period, a change of -7.7 percent. This reflects tooling budget across 3 units. In this section we discuss report budget. The observed value was 10.1 compared to 44.9 in the prior period, a change of -7.7 percent. This reflects tooling budget across 3 units. In this section we discuss report budget. The observed value was 10.1 compared to 44.9 in the prior period, a change of -7.7 percent. This reflects tooling budget across 3 units. In this section we discuss report budget. The observed value was 10.1 compared to 44.9 in the prior period, a change of -7.7 percent. This reflects tooling budget across 3 units.

In this section we discuss report budget. The observed value was 35.9 compared to 26.8 in the

prior period, a change of 8.5 percent. This reflects vendor consolidation across 9 units. In this section we discuss report budget. The observed value was 35.9 compared to 26.8 in the prior period, a change of 8.5 percent. This reflects vendor consolidation across 9 units. In this section we discuss report budget. The observed value was 35.9 compared to 26.8 in the prior period, a change of 8.5 percent. This reflects vendor consolidation across 9 units. In this section we discuss report budget. The observed value was 35.9 compared to 26.8 in the prior period, a change of 8.5 percent. This reflects vendor consolidation across 9 units.

In this section we discuss report budget. The observed value was 10.9 compared to 4.3 in the prior period, a change of -17.9 percent. This reflects tooling budget across 9 units. In this section we discuss report budget. The observed value was 10.9 compared to 4.3 in the prior period, a change of -17.9 percent. This reflects tooling budget across 9 units. In this section we discuss report budget. The observed value was 10.9 compared to 4.3 in the prior period, a change of -17.9 percent. This reflects tooling budget across 9 units. In this section we discuss report budget. The observed value was 10.9 compared to 4.3 in the prior period, a change of -17.9 percent. This reflects tooling budget across 9 units.

In this section we discuss report budget. The observed value was 40.9 compared to 72.1 in the prior period, a change of 1.9 percent. This reflects tooling budget across 7 units. In this section we discuss report budget. The observed value was 40.9 compared to 72.1 in the prior period, a change of 1.9 percent. This reflects tooling budget across 7 units. In this section we discuss report budget. The observed value was 40.9 compared to 72.1 in the prior period, a change of 1.9 percent. This reflects tooling budget across 7 units. In this section we discuss report budget. The observed value was 40.9 compared to 72.1 in the prior period, a change of 1.9 percent. This reflects tooling budget across 7 units.

In this section we discuss report budget. The observed value was 52.9 compared to 43.8 in the prior period, a change of -6.1 percent. This reflects travel policy across 5 units. In this section we discuss report budget. The observed value was 52.9 compared to 43.8 in the prior period, a change of -6.1 percent. This reflects travel policy across 5 units. In this section we discuss report budget. The observed value was 52.9 compared to 43.8 in the prior period, a change of -6.1 percent. This reflects travel policy across 5 units. In this section we discuss report budget. The observed value was 52.9 compared to 43.8 in the prior period, a change of -6.1 percent. This reflects travel policy across 5 units.

In this section we discuss report budget. The observed value was 83.3 compared to 11.9 in the prior period, a change of 15.8 percent. This reflects travel policy across 9 units. In this section we discuss report budget. The observed value was 83.3 compared to 11.9 in the prior period, a change of 15.8 percent. This reflects travel policy across 9 units. In this section we discuss report budget. The observed value was 83.3 compared to 11.9 in the prior period, a change of 15.8 percent. This reflects travel policy across 9 units. In this section we discuss report budget. The observed value was 83.3 compared to 11.9 in the prior period, a change of 15.8 percent. This reflects travel policy across 9 units.

In this section we discuss report budget. The observed value was 62.5 compared to 82.8 in the prior period, a change of -14.1 percent. This reflects tooling budget across 2 units. In this section we discuss report budget. The observed value was 62.5 compared to 82.8 in the prior period, a change of -14.1 percent. This reflects tooling budget across 2 units. In this section we discuss report budget. The observed value was 62.5 compared to 82.8 in the prior period, a change of -14.1 percent. This reflects tooling budget across 2 units. In this section we discuss

report budget. The observed value was 62.5 compared to 82.8 in the prior period, a change of -14.1 percent. This reflects tooling budget across 2 units.

In this section we discuss report budget. The observed value was 68.1 compared to 60.8 in the prior period, a change of -8.5 percent. This reflects vendor consolidation across 8 units. In this section we discuss report budget. The observed value was 68.1 compared to 60.8 in the prior period, a change of -8.5 percent. This reflects vendor consolidation across 8 units. In this section we discuss report budget. The observed value was 68.1 compared to 60.8 in the prior period, a change of -8.5 percent. This reflects vendor consolidation across 8 units. In this section we discuss report budget. The observed value was 68.1 compared to 60.8 in the prior period, a change of -8.5 percent. This reflects vendor consolidation across 8 units.

In this section we discuss report budget. The observed value was 24.9 compared to 1.6 in the prior period, a change of -15.1 percent. This reflects quarterly expenses across 2 units. In this section we discuss report budget. The observed value was 24.9 compared to 1.6 in the prior period, a change of -15.1 percent. This reflects quarterly expenses across 2 units. In this section we discuss report budget. The observed value was 24.9 compared to 1.6 in the prior period, a change of -15.1 percent. This reflects quarterly expenses across 2 units. In this section we discuss report budget. The observed value was 24.9 compared to 1.6 in the prior period, a change of -15.1 percent. This reflects quarterly expenses across 2 units.

In this section we discuss report budget. The observed value was 66.7 compared to 69.9 in the prior period, a change of 14.6 percent. This reflects travel policy across 5 units. In this section we discuss report budget. The observed value was 66.7 compared to 69.9 in the prior period, a change of 14.6 percent. This reflects travel policy across 5 units. In this section we discuss report budget. The observed value was 66.7 compared to 69.9 in the prior period, a change of 14.6 percent. This reflects travel policy across 5 units. In this section we discuss report budget. The observed value was 66.7 compared to 69.9 in the prior period, a change of 14.6 percent. This reflects travel policy across 5 units.

In this section we discuss report budget. The observed value was 92.6 compared to 34.8 in the prior period, a change of -10.6 percent. This reflects tooling budget across 6 units. In this section we discuss report budget. The observed value was 92.6 compared to 34.8 in the prior period, a change of -10.6 percent. This reflects tooling budget across 6 units. In this section we discuss report budget. The observed value was 92.6 compared to 34.8 in the prior period, a change of -10.6 percent. This reflects tooling budget across 6 units. In this section we discuss report budget. The observed value was 92.6 compared to 34.8 in the prior period, a change of -10.6 percent. This reflects tooling budget across 6 units.

In this section we discuss report budget. The observed value was 31.2 compared to 93.2 in the prior period, a change of 13.1 percent. This reflects quarterly expenses across 7 units. In this section we discuss report budget. The observed value was 31.2 compared to 93.2 in the prior period, a change of 13.1 percent. This reflects quarterly expenses across 7 units. In this section we discuss report budget. The observed value was 31.2 compared to 93.2 in the prior period, a change of 13.1 percent. This reflects quarterly expenses across 7 units. In this section we discuss report budget. The observed value was 31.2 compared to 93.2 in the prior period, a change of 13.1 percent. This reflects quarterly expenses across 7 units.
