# Report: Report Travel

In this section we discuss report travel. The observed value was 26.0 compared to 78.1 in the prior period, a change of 1.3 percent. This reflects vendor consolidation across 7 units. In this section we discuss report travel. The observed value was 26.0 compared to 78.1 in the prior period, a change of 1.3 percent. This reflects vendor consolidation across 7 units. In this section we discuss report travel. The observed value was 26.0 compared to 78.1 in the prior period, a change of 1.3 percent. This reflects vendor consolidation across 7 units. In this section we discuss report travel. The observed value was 26.0 compared to 78.1 in the prior period, a change of 1.3 percent. This reflects vendor consolidation across 7 units.

In this section we discuss report travel. The observed value was 3.3 compared to 8.6 in the prior period, a change of -4.1 percent. This reflects vendor consolidation across 6 units. In this section we discuss report travel. The observed value was 3.3 compared to 8.6 in the prior period, a change of -4.1 percent. This reflects vendor consolidation across 6 units. In this section we discuss report travel. The observed value was 3.3 compared to 8.6 in the prior period, a change of -4.1 percent. This reflects vendor consolidation across 6 units. In this section we discuss report travel. The observed value was 3.3 compared to 8.6 in the prior period, a change of -4.1 percent. This reflects vendor consolidation across 6 units.

In this section we discuss report travel. The observed value was 35.3 compared to 98.9 in the prior period, a change of -9.6 percent. This reflects travel policy across 2 units. In this section we discuss report travel. The observed value was 35.3 compared to 98.9 in the prior period, a change of -9.6 percent. This reflects travel policy across 2 units. In this section we discuss report travel. The observed value was 35.3 compared to 98.9 in the prior period, a change of -9.6 percent. This reflects travel policy across 2 units. In this section we discuss report travel. The observed value was 35.3 compared to 98.9 in the prior period, a change of -9.6 percent. This reflects travel policy across 2 units.

In this section we discuss report travel. The observed value was 57.2 compared to 3.0 in the prior period, a change of -1.8 percent. This reflects tooling budget across 4 units. In this section we discuss report travel. The observed value was 57.2 compared to 3.0 in the prior period, a change of -1.8 percent. This reflects tooling budget across 4 units. In this section we discuss report travel. The observed value was 57.2 compared to 3.0 in the prior period, a change of -1.8 percent. This reflects tooling budget across 4 units. In this section we discuss report travel. The observed value was 57.2 compared to 3.0 in the prior period, a change of -1.8 percent. This reflects tooling budget across 4 units.

In this section we discuss report travel. The observed value was 29.9 compared to 95.7 in the prior period, a change of -8.6 percent. This reflects tooling budget across 6 units. In this section we discuss report travel. The observed value was 29.9 compared to 95.7 in the prior period, a change of -8.6 percent. This reflects tooling budget across 6 units. In this section we discuss report travel. The observed value was 29.9 compared to 95.7 in the prior period, a change of -8.6 percent. This reflects tooling budget across 6 units. In this section we discuss report travel. The observed value was 29.9 compared to 95.7 in the prior period, a change of -8.6 percent. This reflects tooling budget across 6 units.

In this section we discuss report travel. The observed value was 84.4 compared to 38.0 in the prior period, a change of -6.8 percent. This reflects quarterly expenses across 6 units. In this section we discuss report travel. The observed value was 84.4 compared to 38.0 in the prior

period, a change of -6.8 percent. This reflects quarterly expenses across 6 units. In this section we discuss report travel. The observed value was 84.4 compared to 38.0 in the prior period, a change of -6.8 percent. This reflects quarterly expenses across 6 units. In this section we discuss report travel. The observed value was 84.4 compared to 38.0 in the prior period, a change of -6.8 percent. This reflects quarterly expenses across 6 units.

In this section we discuss report travel. The observed value was 25.9 compared to 88.8 in the prior period, a change of 16.7 percent. This reflects vendor consolidation across 5 units. In this section we discuss report travel. The observed value was 25.9 compared to 88.8 in the prior period, a change of 16.7 percent. This reflects vendor consolidation across 5 units. In this section we discuss report travel. The observed value was 25.9 compared to 88.8 in the prior period, a change of 16.7 percent. This reflects vendor consolidation across 5 units. In this section we discuss report travel. The observed value was 25.9 compared to 88.8 in the prior period, a change of 16.7 percent. This reflects vendor consolidation across 5 units.

In this section we discuss report travel. The observed value was 32.8 compared to 74.7 in the prior period, a change of -7.9 percent. This reflects travel policy across 2 units. In this section we discuss report travel. The observed value was 32.8 compared to 74.7 in the prior period, a change of -7.9 percent. This reflects travel policy across 2 units. In this section we discuss report travel. The observed value was 32.8 compared to 74.7 in the prior period, a change of -7.9 percent. This reflects travel policy across 2 units. In this section we discuss report travel. The observed value was 32.8 compared to 74.7 in the prior period, a change of -7.9 percent. This reflects travel policy across 2 units.

In this section we discuss report travel. The observed value was 28.7 compared to 70.4 in the prior period, a change of -9.2 percent. This reflects vendor consolidation across 5 units. In this section we discuss report travel. The observed value was 28.7 compared to 70.4 in the prior period, a change of -9.2 percent. This reflects vendor consolidation across 5 units. In this section we discuss report travel. The observed value was 28.7 compared to 70.4 in the prior period, a change of -9.2 percent. This reflects vendor consolidation across 5 units. In this section we discuss report travel. The observed value was 28.7 compared to 70.4 in the prior period, a change of -9.2 percent. This reflects vendor consolidation across 5 units.

In this section we discuss report travel. The observed value was 10.6 compared to 4.6 in the prior period, a change of 16.5 percent. This reflects vendor consolidation across 2 units. In this section we discuss report travel. The observed value was 10.6 compared to 4.6 in the prior period, a change of 16.5 percent. This reflects vendor consolidation across 2 units. In this section we discuss report travel. The observed value was 10.6 compared to 4.6 in the prior period, a change of 16.5 percent. This reflects vendor consolidation across 2 units. In this section we discuss report travel. The observed value was 10.6 compared to 4.6 in the prior period, a change of 16.5 percent. This reflects vendor consolidation across 2 units.

In this section we discuss report travel. The observed value was 72.9 compared to 19.0 in the prior period, a change of 13.5 percent. This reflects quarterly expenses across 4 units. In this section we discuss report travel. The observed value was 72.9 compared to 19.0 in the prior period, a change of 13.5 percent. This reflects quarterly expenses across 4 units. In this section we discuss report travel. The observed value was 72.9 compared to 19.0 in the prior period, a change of 13.5 percent. This reflects quarterly expenses across 4 units. In this section we discuss report travel. The observed value was 72.9 compared to 19.0 in the prior period, a change of 13.5 percent. This reflects quarterly expenses across 4 units.

In this section we discuss report travel. The observed value was 33.4 compared to 98.5 in the prior period, a change of 8.7 percent. This reflects quarterly expenses across 9 units. In this section we discuss report travel. The observed value was 33.4 compared to 98.5 in the prior period, a change of 8.7 percent. This reflects quarterly expenses across 9 units. In this section we discuss report travel. The observed value was 33.4 compared to 98.5 in the prior period, a change of 8.7 percent. This reflects quarterly expenses across 9 units. In this section we discuss report travel. The observed value was 33.4 compared to 98.5 in the prior period, a change of 8.7 percent. This reflects quarterly expenses across 9 units.

In this section we discuss report travel. The observed value was 41.1 compared to 40.0 in the prior period, a change of -4.9 percent. This reflects vendor consolidation across 7 units. In this section we discuss report travel. The observed value was 41.1 compared to 40.0 in the prior period, a change of -4.9 percent. This reflects vendor consolidation across 7 units. In this section we discuss report travel. The observed value was 41.1 compared to 40.0 in the prior period, a change of -4.9 percent. This reflects vendor consolidation across 7 units. In this section we discuss report travel. The observed value was 41.1 compared to 40.0 in the prior period, a change of -4.9 percent. This reflects vendor consolidation across 7 units.

In this section we discuss report travel. The observed value was 15.3 compared to 47.3 in the prior period, a change of -3.0 percent. This reflects tooling budget across 2 units. In this section we discuss report travel. The observed value was 15.3 compared to 47.3 in the prior period, a change of -3.0 percent. This reflects tooling budget across 2 units. In this section we discuss report travel. The observed value was 15.3 compared to 47.3 in the prior period, a change of -3.0 percent. This reflects tooling budget across 2 units. In this section we discuss report travel. The observed value was 15.3 compared to 47.3 in the prior period, a change of -3.0 percent. This reflects tooling budget across 2 units.

In this section we discuss report travel. The observed value was 82.5 compared to 19.9 in the prior period, a change of 2.4 percent. This reflects vendor consolidation across 6 units. In this section we discuss report travel. The observed value was 82.5 compared to 19.9 in the prior period, a change of 2.4 percent. This reflects vendor consolidation across 6 units. In this section we discuss report travel. The observed value was 82.5 compared to 19.9 in the prior period, a change of 2.4 percent. This reflects vendor consolidation across 6 units. In this section we discuss report travel. The observed value was 82.5 compared to 19.9 in the prior period, a change of 2.4 percent. This reflects vendor consolidation across 6 units.

In this section we discuss report travel. The observed value was 3.2 compared to 80.3 in the prior period, a change of -13.6 percent. This reflects travel policy across 9 units. In this section we discuss report travel. The observed value was 3.2 compared to 80.3 in the prior period, a change of -13.6 percent. This reflects travel policy across 9 units. In this section we discuss report travel. The observed value was 3.2 compared to 80.3 in the prior period, a change of -13.6 percent. This reflects travel policy across 9 units. In this section we discuss report travel. The observed value was 3.2 compared to 80.3 in the prior period, a change of -13.6 percent. This reflects travel policy across 9 units.

In this section we discuss report travel. The observed value was 93.1 compared to 17.0 in the prior period, a change of -1.5 percent. This reflects vendor consolidation across 7 units. In this section we discuss report travel. The observed value was 93.1 compared to 17.0 in the prior period, a change of -1.5 percent. This reflects vendor consolidation across 7 units. In this

section we discuss report travel. The observed value was 93.1 compared to 17.0 in the prior period, a change of -1.5 percent. This reflects vendor consolidation across 7 units. In this section we discuss report travel. The observed value was 93.1 compared to 17.0 in the prior period, a change of -1.5 percent. This reflects vendor consolidation across 7 units.

In this section we discuss report travel. The observed value was 17.1 compared to 45.4 in the prior period, a change of -18.6 percent. This reflects quarterly expenses across 8 units. In this section we discuss report travel. The observed value was 17.1 compared to 45.4 in the prior period, a change of -18.6 percent. This reflects quarterly expenses across 8 units. In this section we discuss report travel. The observed value was 17.1 compared to 45.4 in the prior period, a change of -18.6 percent. This reflects quarterly expenses across 8 units. In this section we discuss report travel. The observed value was 17.1 compared to 45.4 in the prior period, a change of -18.6 percent. This reflects quarterly expenses across 8 units.

In this section we discuss report travel. The observed value was 48.9 compared to 12.2 in the prior period, a change of 0.1 percent. This reflects travel policy across 8 units. In this section we discuss report travel. The observed value was 48.9 compared to 12.2 in the prior period, a change of 0.1 percent. This reflects travel policy across 8 units. In this section we discuss report travel. The observed value was 48.9 compared to 12.2 in the prior period, a change of 0.1 percent. This reflects travel policy across 8 units. In this section we discuss report travel. The observed value was 48.9 compared to 12.2 in the prior period, a change of 0.1 percent. This reflects travel policy across 8 units.

In this section we discuss report travel. The observed value was 33.6 compared to 56.9 in the prior period, a change of 11.3 percent. This reflects vendor consolidation across 3 units. In this section we discuss report travel. The observed value was 33.6 compared to 56.9 in the prior period, a change of 11.3 percent. This reflects vendor consolidation across 3 units. In this section we discuss report travel. The observed value was 33.6 compared to 56.9 in the prior period, a change of 11.3 percent. This reflects vendor consolidation across 3 units. In this section we discuss report travel. The observed value was 33.6 compared to 56.9 in the prior period, a change of 11.3 percent. This reflects vendor consolidation across 3 units.

In this section we discuss report travel. The observed value was 45.1 compared to 85.4 in the prior period, a change of 17.7 percent. This reflects travel policy across 3 units. In this section we discuss report travel. The observed value was 45.1 compared to 85.4 in the prior period, a change of 17.7 percent. This reflects travel policy across 3 units. In this section we discuss report travel. The observed value was 45.1 compared to 85.4 in the prior period, a change of 17.7 percent. This reflects travel policy across 3 units. In this section we discuss report travel. The observed value was 45.1 compared to 85.4 in the prior period, a change of 17.7 percent. This reflects travel policy across 3 units.
