Report: Report Vendor

In this section we discuss report vendor. The observed value was 68.3 compared to 58.3 in the prior period, a change of 14.2 percent. This reflects quarterly expenses across 5 units. In this section we discuss report vendor. The observed value was 68.3 compared to 58.3 in the prior period, a change of 14.2 percent. This reflects quarterly expenses across 5 units. In this section we discuss report vendor. The observed value was 68.3 compared to 58.3 in the prior period, a change of 14.2 percent. This reflects quarterly expenses across 5 units. In this section we discuss report vendor. The observed value was 68.3 compared to 58.3 in the prior period, a change of 14.2 percent. This reflects quarterly expenses across 5 units.

In this section we discuss report vendor. The observed value was 23.8 compared to 1.3 in the prior period, a change of 13.0 percent. This reflects vendor consolidation across 2 units. In this section we discuss report vendor. The observed value was 23.8 compared to 1.3 in the prior period, a change of 13.0 percent. This reflects vendor consolidation across 2 units. In this section we discuss report vendor. The observed value was 23.8 compared to 1.3 in the prior period, a change of 13.0 percent. This reflects vendor consolidation across 2 units. In this section we discuss report vendor. The observed value was 23.8 compared to 1.3 in the prior period, a change of 13.0 percent. This reflects vendor consolidation across 2 units.

In this section we discuss report vendor. The observed value was 20.7 compared to 31.5 in the prior period, a change of 8.1 percent. This reflects quarterly expenses across 5 units. In this section we discuss report vendor. The observed value was 20.7 compared to 31.5 in the prior period, a change of 8.1 percent. This reflects quarterly expenses across 5 units. In this section we discuss report vendor. The observed value was 20.7 compared to 31.5 in the prior period, a change of 8.1 percent. This reflects quarterly expenses across 5 units. In this section we discuss report vendor. The observed value was 20.7 compared to 31.5 in the prior period, a change of 8.1 percent. This reflects quarterly expenses across 5 units.

In this section we discuss report vendor. The observed value was 75.9 compared to 51.3 in the prior period, a change of -11.3 percent. This reflects tooling budget across 2 units. In this section we discuss report vendor. The observed value was 75.9 compared to 51.3 in the prior period, a change of -11.3 percent. This reflects tooling budget across 2 units. In this section we discuss report vendor. The observed value was 75.9 compared to 51.3 in the prior period, a change of -11.3 percent. This reflects tooling budget across 2 units. In this section we discuss report vendor. The observed value was 75.9 compared to 51.3 in the prior period, a change of -11.3 percent. This reflects tooling budget across 2 units.

In this section we discuss report vendor. The observed value was 59.3 compared to 37.4 in the prior period, a change of 3.4 percent. This reflects tooling budget across 2 units. In this section we discuss report vendor. The observed value was 59.3 compared to 37.4 in the prior period, a change of 3.4 percent. This reflects tooling budget across 2 units. In this section we discuss report vendor. The observed value was 59.3 compared to 37.4 in the prior period, a change of 3.4 percent. This reflects tooling budget across 2 units. In this section we discuss report vendor. The observed value was 59.3 compared to 37.4 in the prior period, a change of 3.4 percent. This reflects tooling budget across 2 units.

In this section we discuss report vendor. The observed value was 7.1 compared to 96.4 in the prior period, a change of -14.1 percent. This reflects quarterly expenses across 3 units. In this section we discuss report vendor. The observed value was 7.1 compared to 96.4 in the prior

period, a change of -14.1 percent. This reflects quarterly expenses across 3 units. In this section we discuss report vendor. The observed value was 7.1 compared to 96.4 in the prior period, a change of -14.1 percent. This reflects quarterly expenses across 3 units. In this section we discuss report vendor. The observed value was 7.1 compared to 96.4 in the prior period, a change of -14.1 percent. This reflects quarterly expenses across 3 units.

In this section we discuss report vendor. The observed value was 56.7 compared to 51.8 in the prior period, a change of 0.5 percent. This reflects quarterly expenses across 4 units. In this section we discuss report vendor. The observed value was 56.7 compared to 51.8 in the prior period, a change of 0.5 percent. This reflects quarterly expenses across 4 units. In this section we discuss report vendor. The observed value was 56.7 compared to 51.8 in the prior period, a change of 0.5 percent. This reflects quarterly expenses across 4 units. In this section we discuss report vendor. The observed value was 56.7 compared to 51.8 in the prior period, a change of 0.5 percent. This reflects quarterly expenses across 4 units.

In this section we discuss report vendor. The observed value was 44.2 compared to 76.2 in the prior period, a change of 18.2 percent. This reflects tooling budget across 9 units. In this section we discuss report vendor. The observed value was 44.2 compared to 76.2 in the prior period, a change of 18.2 percent. This reflects tooling budget across 9 units. In this section we discuss report vendor. The observed value was 44.2 compared to 76.2 in the prior period, a change of 18.2 percent. This reflects tooling budget across 9 units. In this section we discuss report vendor. The observed value was 44.2 compared to 76.2 in the prior period, a change of 18.2 percent. This reflects tooling budget across 9 units.

In this section we discuss report vendor. The observed value was 71.4 compared to 78.3 in the prior period, a change of -15.0 percent. This reflects tooling budget across 5 units. In this section we discuss report vendor. The observed value was 71.4 compared to 78.3 in the prior period, a change of -15.0 percent. This reflects tooling budget across 5 units. In this section we discuss report vendor. The observed value was 71.4 compared to 78.3 in the prior period, a change of -15.0 percent. This reflects tooling budget across 5 units. In this section we discuss report vendor. The observed value was 71.4 compared to 78.3 in the prior period, a change of -15.0 percent. This reflects tooling budget across 5 units.

In this section we discuss report vendor. The observed value was 75.7 compared to 87.0 in the prior period, a change of -5.2 percent. This reflects travel policy across 5 units. In this section we discuss report vendor. The observed value was 75.7 compared to 87.0 in the prior period, a change of -5.2 percent. This reflects travel policy across 5 units. In this section we discuss report vendor. The observed value was 75.7 compared to 87.0 in the prior period, a change of -5.2 percent. This reflects travel policy across 5 units. In this section we discuss report vendor. The observed value was 75.7 compared to 87.0 in the prior period, a change of -5.2 percent. This reflects travel policy across 5 units.

In this section we discuss report vendor. The observed value was 1.6 compared to 8.4 in the prior period, a change of -11.2 percent. This reflects tooling budget across 9 units. In this section we discuss report vendor. The observed value was 1.6 compared to 8.4 in the prior period, a change of -11.2 percent. This reflects tooling budget across 9 units. In this section we discuss report vendor. The observed value was 1.6 compared to 8.4 in the prior period, a change of -11.2 percent. This reflects tooling budget across 9 units. In this section we discuss report vendor. The observed value was 1.6 compared to 8.4 in the prior period, a change of -11.2 percent. This reflects tooling budget across 9 units.

In this section we discuss report vendor. The observed value was 63.0 compared to 74.2 in the prior period, a change of 14.2 percent. This reflects quarterly expenses across 7 units. In this section we discuss report vendor. The observed value was 63.0 compared to 74.2 in the prior period, a change of 14.2 percent. This reflects quarterly expenses across 7 units. In this section we discuss report vendor. The observed value was 63.0 compared to 74.2 in the prior period, a change of 14.2 percent. This reflects quarterly expenses across 7 units. In this section we discuss report vendor. The observed value was 63.0 compared to 74.2 in the prior period, a change of 14.2 percent. This reflects quarterly expenses across 7 units.

In this section we discuss report vendor. The observed value was 5.1 compared to 89.2 in the prior period, a change of 17.9 percent. This reflects tooling budget across 2 units. In this section we discuss report vendor. The observed value was 5.1 compared to 89.2 in the prior period, a change of 17.9 percent. This reflects tooling budget across 2 units. In this section we discuss report vendor. The observed value was 5.1 compared to 89.2 in the prior period, a change of 17.9 percent. This reflects tooling budget across 2 units. In this section we discuss report vendor. The observed value was 5.1 compared to 89.2 in the prior period, a change of 17.9 percent. This reflects tooling budget across 2 units.
